EXTRATERRESTRIAL TECHNOLOGY

From time to time the question is asked: “The extraterrestrials that are visiting the Earth appear to have a highly advanced technology, why don’t they pass on this knowledge to us?” The answer is they have!

On the following pages is a list of unique items that were inspired by the extraterrestrial visitors, and are now under US patent and in some cases international patent.

The patents among those listed below that are titled: Flight event record system and Aircraft navigational warning system have been collectively granted a unheard of number of claims ... thirty nine!

Several other forms of extraterrestrial technology relating to music, medicine and agriculture will also be described in this article.

This article will conclude with a video that physically demonstrates ET technology that dates back to the time that the Great Pyramid was built.

In this video you will actually see the Ra System of Mathematics physically functioning in the three dimensional universe.

The extraterrestrials have been attempting to inform us of the great value of the Ra System of Mathematics. By creating very informative geometrical designs in grain fields (crop formations), and also by way of their nine radio messages of 1995. I should add that there is good reason to believe that there could be many more than nine.

Their goal is obvious. If we understand the Ra System of Mathematics which is the basis of their technology, we can easily, and rapidly figure it out the technology for ourselves. Their knowledge of the Ra System is a great gift.

They have been developing, and using their technology for millions of years. It will be exciting catching up with them.

Dolan Springs, AZ, US

Alan Howarth
Los Angeles, CA, US

Recent patents listed: 20050268774 -

Patent Title:
**Frequency spectrum conversion to natural harmonic
frequencies process**

**See Alan's impressive motion picture credits, such as the Star
Trek motion pictures at the following web site:**

Alan Howarth bio at: <http://www.alanhowarth.com/bio.shtml>

Wesley H. Bateman
Patent No. : 6092008

Patent Title: Flight event record system

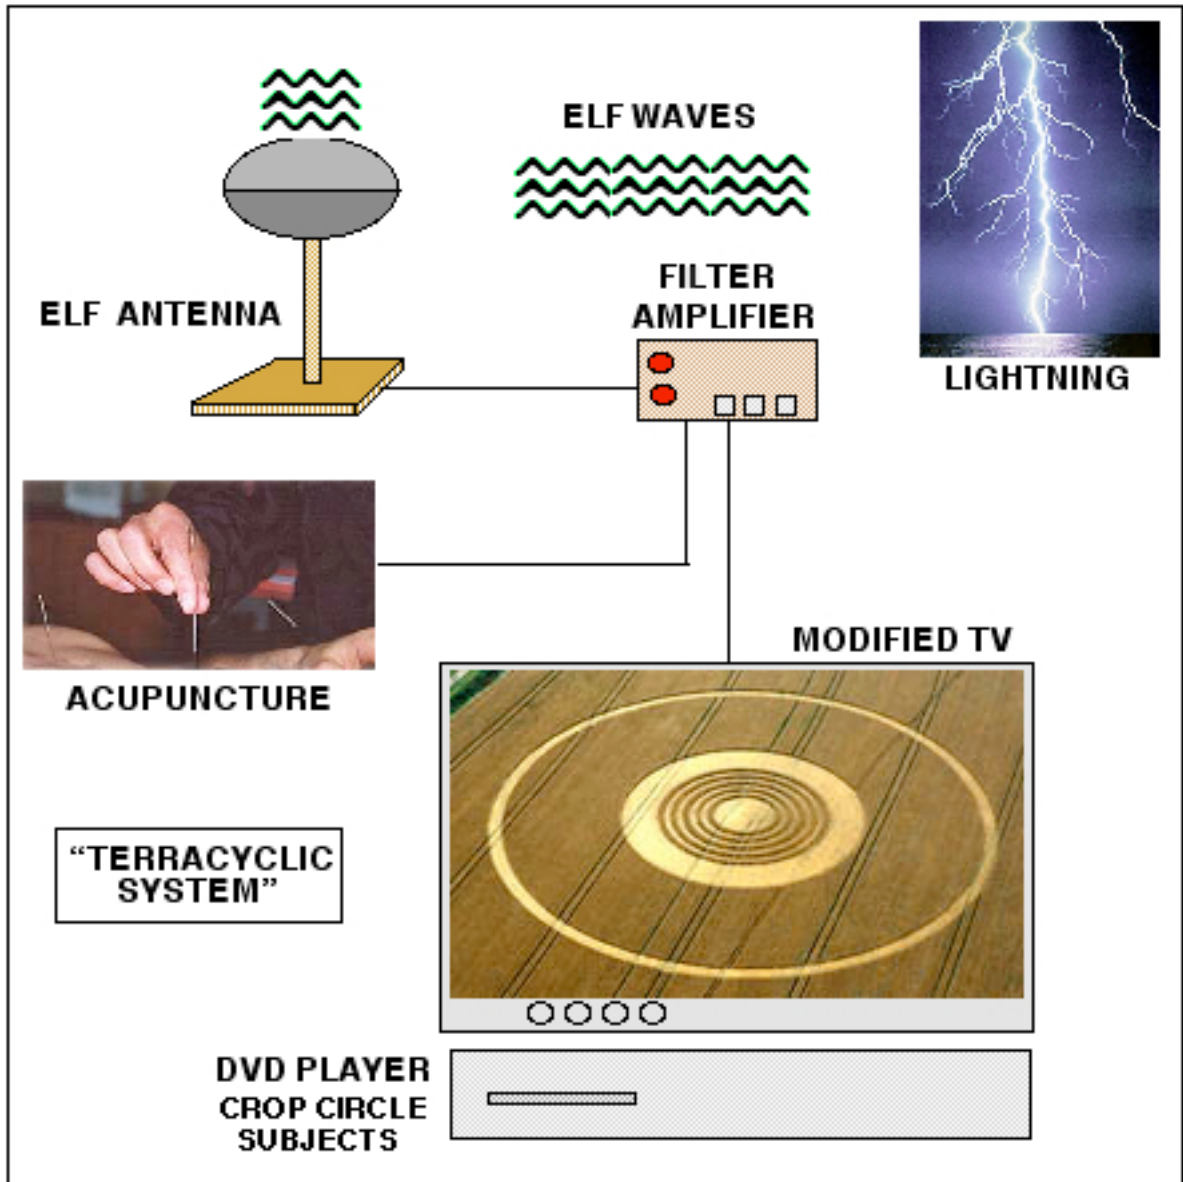

An in-flight event recording system for acquiring data related to an aircraft, its physical condition and functioning, its altitude, position and speed, direction of travel, and any unusual events. The in-flight event recording system processes and stores the data and is able to continuously Issue **Date:** 2000-07-18

Wesley H. Bateman
Patent No. : 6219618

Patent Title: Aircraft navigational warning system

An aircraft navigational system allows for reduced storage and increased computing power for comparing terrain maps to the flight path and enroute track of the aircraft. Unique provisions are made for reporting and recording navigational hazards. Issue **Date:** 2001-04-17

TERRA CYCLIC MEDITATIONAL AID, AND STRESS REDUCER

The Terra cyclic System shown above is also based on Extraterrestrial instruction.

Wait till you see what this system can really do. Especially in conjunction with Ra System formulated homeopathic Elixirs, natural elf wave acupuncture, crop formation images, and Ra Music. For more information see: Knowledge From the Stars, Part Seven, page 20.

AGRA -TONES

Deanna Bateman, Director: Agra Tone Project

Wes Bateman's daughter Deanna is in charge of our experimental research project which employs the use of Ra music to treat plant seeds and stimulate plant growth. Specific Ra frequencies that relate to specific plant species are also utilized.

These experiments are being conducted in the very arid climate of the Mohave Desert in northern Arizona. The soil is classified as extremely poor for growing.

Jungle in the Desert: Trees 2 year growth!

The results have been phenomenal. Watch for additional pictures, and more information on this project in future articles.

The vegetables are larger than normal, grow rapidly, and are delicious.

“And the Deserts Shall Bloom”

There are literally hundreds of ET inspired projects that are known to be feasible. But because we of the Ra Research Society fund everything we do, and build them ourselves, we must take a practical approach, and concentrated on what will do the most good for the most people in the shortest period of time.

If after viewing the following video you are not convinced that the extraterrestrials are willing to share their technology with us, you will never be convinced.

THE MIDAS PROJECT VIDEO

Narrated by
Baron Clement Von Franckenstein
Mary Shelly used his family name for her famous story.

Produced, written, photographed by Ra Team member Mark Jones.
(Jonsey)

Internet presentation of the Midas Video by Ra team member
Rod C. Davis

When viewing the video, note that the custom made “magnetic chuck” was designed on the order of the Grand Galley in the Great Pyramid of Giza. This is very old ET technology.

To Whom it May Concern:

This is to certify that I have known Mr. Wesley Bateman for approximately two years. During that time he has allowed me to read a large proportion of the material he has written concerning the architectural structure, functions, and possible theoretical implications of megalithic structures in Egypt and elsewhere.

From these readings and my numerous conversations with Mr. Bateman, I feel that other professional archaeologists should seriously consider what Mr. Bateman has presented. It is only through many lines of evidence will we be able to understand past societies. Again, I urge you to carefully examine Mr. Bateman's years of research.

Sincerely yours,
Brad Bartel, Ph.D.
